

3.2 Solution Requirements

Multi-Line Insurance Policy and Claims Management System

Functional Requirements

FR No	Functional Requirement
FR-01	The system shall allow users to create and manage Insurance Policy records for Vehicle, Property, and Life Insurance.
FR-02	The system shall support separate Record Types for Vehicle, Property, and Life policies.
FR-03	The system shall capture product-specific policy information such as VIN for Vehicle Insurance and Square Footage/Year Built for Property Insurance.
FR-04	The system shall provide a guided Auto Quoting Screen Flow to capture policy holder, policy start date, state, VIN, and model year.
FR-05	The system shall create a draft policy during the quoting process.
FR-06	The system shall calculate policy premiums using Apex-based premium calculation logic.
FR-07	The system shall validate Vehicle Insurance VINs and ensure that the VIN contains exactly 17 characters.
FR-08	The system shall allow users to create and manage Claim records associated with policies.
FR-09	The system shall support different Claim Record Types for Accident, Property, and Life claims.
FR-10	The system shall automatically route claims to the appropriate queue based on the related policy type.
FR-11	The system shall identify high-value claims based on the configured claim amount threshold.
FR-12	The system shall submit qualifying high-value claims through a multi-level approval process involving Senior Adjusters and Claims Managers.
FR-13	The system shall provide an Approve/Reject Claim capability with approver comments.
FR-14	The system shall provide Claims Adjusters with an LWC Claims Dashboard showing assigned claims.
FR-15	The dashboard shall display information such as Claim Number, Policy Type, Policy Holder, Claim Amount, Status, and Days Open.
FR-16	The dashboard shall allow users to filter claims by All, Auto, Property, and Life.
FR-17	The system shall provide automated updates to related Policy and Claim records through Record-Triggered Flows.
FR-18	The system shall support state-based access/sharing for applicable insurance users and records.
FR-19	The system shall provide role-specific access through Permission Sets for Insurance Agents, Claims Adjusters, and Claims Managers.
FR-20	The system shall support reporting and visibility of Customer, Policy, and Claim information from the centralized Salesforce platform.

Non-Functional Requirements

The following requirements describe the expected quality, usability, security, scalability, and maintainability of the solution. Some are derived requirements based on the project's stated objectives and challenges rather than explicitly documented as formal NFRs.

ID	Non-Functional Requirement	Description
NFR-01	Usability	The system should provide simple, guided Screen Flows that minimize unnecessary clicks and make policy quoting easy for agents.
NFR-02	Performance	Policy quoting, premium calculation, claim routing, and dashboard operations should execute efficiently to support day-to-day insurance operations.
NFR-03	Scalability	The solution should support the three insurance lines—Vehicle, Property, and Life—and allow additional insurance products to be accommodated in the future.
NFR-04	Data Integrity	Policy and claim information should be validated to maintain accurate and consistent data across insurance products.
NFR-05	Security	Access to insurance information should be controlled according to the user's responsibility, including state-based sharing and role-specific Permission Sets.
NFR-06	Maintainability	The solution should use modular Salesforce components such as Flows, Apex classes, LWC components, Record Types, and Field Sets so that individual components can be maintained independently.
NFR-07	Reliability	Automated claim routing, premium calculation, and approval processes should consistently execute according to the configured business rules.
NFR-08	Extensibility	The data model should accommodate different product-specific fields without requiring completely separate structures for each insurance line.
NFR-09	Visibility	Users should have timely access to relevant Customer, Policy, and Claim information through centralized Salesforce records and the Claims Dashboard.
NFR-10	User Adoption	The application should provide an intuitive experience that reduces manual effort and supports efficient adoption by agents and claims users.
